

# Customer Satisfaction Survey

To install our extension, follow this simple steps:

## 1 - Add our repo to your composer.json file

Open your project composer.json file located in your root magento 2 store directory. Then, find the repositories entry and update like above with our repo url:

<https://customer-satisfaction-survey.composer.sh>

```
"repositories": {  
    "afinco": {  
        "type": "composer",  
        "url": "https://customer-satisfaction-survey.composer.sh"  
    },  
    "repo": {  
        "type": "composer",  
        "url": "https://repo.magento.com"  
    }  
},
```

## 2 - Run composer require:

```
composer require afinco/module-customer-satisfaction-survey
```

Type your Username (e-mail) and your password (licence key).

You will be prompted to store your credentials in your auth.json file. Type Y (yes).

After these simple steps, the module must be successfully installed in your vendor directory.
